

# Stop Banner

Thick vinyl

Attach with Velcro strips

Ideally suited to dementia patients, this banner is a large, highly visible STOP sign to provide a visual reminder not to open the door it is mounted on.

These highly visible signs pose an intuitive message to deter people from opening the door they block. The large banner has clear contrasting colours in easy-to-read text and symbols. Made of thick vinyl, the sign can be cut at both ends to fit the width of the doorway.

Supplied as a kit with two signs and self-adhesive Velcro strips for attachment.
