

Coloured Toilet Seats

Brightly coloured for contrast

Available in moulded plastic or wood

Fits most standard pans

Toilet seat with lid, plastic

Toilet seat with lid, wood

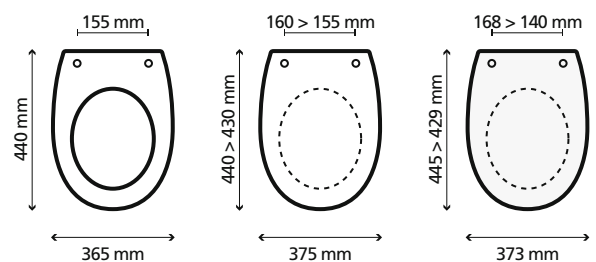

Toilet seat, plastic

A range of coloured plastic or wooden toilet seats from Bemis, ideally suited to dementia patients. Fitted onto any standard toilet to replace the standard seat, these coloured seats help to provide a colour contrast with the white pan or wall for people with dementia or vision impairment.

Contrast is accepted as one of the most important aspects in a dementia care support environment, and these blue coloured toilet seats can help people to more easily locate the toilet.

Available in heavy duty moulded plastic or reclaimed timber seat and lid, guaranteed not to crack or split. With either top or bottom fixing hinges, these durable seats are made with non-corrosive hinge bolts and protected by Duraguard for hygienic plus protection.
